

TechNova Pvt. Ltd. — IT Policy

Fictional project knowledge source for the TechNova Office Assistant.

1. Company Devices

Company laptops, monitors, phones, and other IT assets are provided for authorized business use. Employees are responsible for reasonable care of assigned equipment.

2. Passwords

Employees must use strong passwords, keep credentials confidential, and never share passwords or authentication codes with other people.

3. Software Installation

Only approved software should be installed on company-managed devices. Unapproved or pirated software is prohibited.

4. Security Incidents

Lost devices, suspected malware, phishing messages, or unauthorized access should be reported promptly through the company's approved IT/security channel.

5. Remote Access

Employees accessing company systems remotely must use approved authentication and security controls and should avoid using untrusted public computers.
