

TechNova Pvt. Ltd. — Security Policy

Fictional project knowledge source for the TechNova Office Assistant.

1. Information Protection

Employees must protect confidential company and employee information from unauthorized access, disclosure, alteration, or loss.

2. Phishing

Employees should verify unexpected links, attachments, login requests, and payment requests before taking action. Suspicious messages should be reported to the security team.

3. Data Sharing

Company information should only be shared with authorized recipients and through approved company systems.

4. Clean Desk

Sensitive documents should not be left unattended in shared spaces. Employees should lock their screens when away from their devices.

5. Incident Reporting

Security incidents should be reported promptly with enough information for the security team to investigate the event.
